Site map requirements

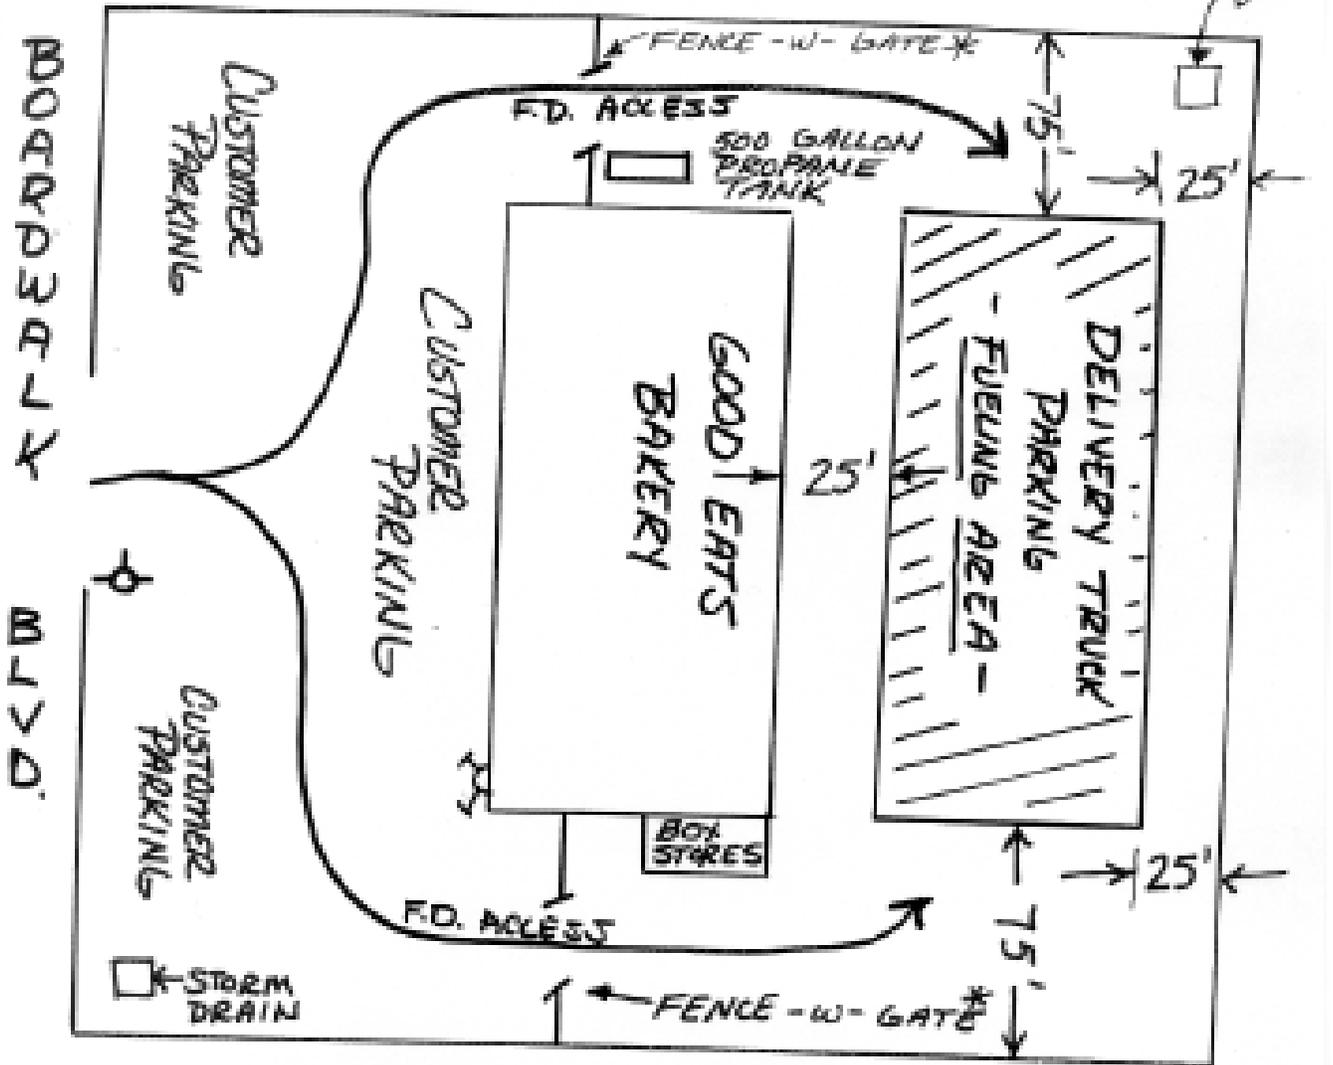

Submit two copies of a site map depicting the site where fueling will occur. Site maps must be neat and orderly and drawn to scale or with all dimension clearly identified. Minimum acceptable size for the map is 8 ½ x 11 inches. See example on page three.

Site map must include the following:

- Company name
- Site address
- Property lines
- Adjacent roadways
- North direction
- Areas used for outside storage
- A clearly defined area where fueling is anticipated to occur
- Buildings on property
- Street access points
- Internal parking, drive and access ways
- LPG or other flammable or combustible liquid tanks, storage or dispensing
- Fire hydrants or fire department connections
- Storm drains
- Other hazards
