

# THREE CREEKS

## VISION AND MISSION STATEMENT

### VISION

By 2020, the Three Creeks area will be an attractive, cohesive, dynamic community that is safe, sustainable, economically and environmentally vibrant, with nodes for learning and health, and with walkable village centers, linked by efficient transit.

### MISSION STATEMENT

It is the mission of the Three Creeks residents to support the objectives, and actions that provides direction for the growth and development of the community.

**Cohesive** – To provide unique neighborhoods that work together to create a “sense of place” for a diverse community.

**Sustainable** – To promote responsible development that will meet the needs of the current and future generations.

**Dynamic** - To be responsive to the evolving needs of the community and all its residents.

**Safe** – To assure healthy communities and neighborhoods that promote good access, quality design, and positive community spirit and pride.

**Walkable village centers** – To provide a pleasing community atmosphere with high quality services, an area with quality of life, a place to live, work, and play. The development of the area should include positive principles of equity, design, and environmental consideration.

**Economic development** – To ensure a thriving economy that supports the business community and further enhances a strong economic base by encouraging a wide array of business and employment opportunities.

**Environment** – To promote responsible development that protects, maintains and enhances sensitive areas, open space, parks, and public areas.

**Attractive** – To promote living and natural environments, trails, landscaping, design standards, and preserve historic places.

**Mobility** – To provide efficient, linked alternative modes of transportation, high-capacity transit, bike, pedestrian, and accessible pathways throughout the community.

**Education** – To promote lifelong learning, research, and institutions integrated into the life of the community.
