Prevent. Promote. Protect.

Pregnancy Test Provider List

Clark County Public Health no longer offers pregnancy testing and counseling services.

The following clinics provide pregnancy tests. These clinics provide information on all options of pregnancy and also offer information on all birth control methods. They are also able to make referrals to community agencies related to getting care regardless of the option that is chosen. They may also be able to give referrals to related community services, according to your needs.

Services at these providers vary on cost, hours and whether or not an appointment is needed. Please call for more information.
